

State Children's Health Insurance Program

SCHIP

The State Children's Health Insurance Program (SCHIP) has become an important source of coverage for children and families. SCHIP and Medicaid together have contributed to the decline in uninsured children from 14% of all children in 1997 to 9% in 2005. SCHIP needs to be reauthorized in 2007 with substantial new funding if the program is to maintain and build on its successes.

SCHIP State Snapshots: Hawaii QUEST

	2005 Enrollment	Federal Match Rate ¹
Hawaii	14,717	70.9%
United States	6.1 million	65%–85%

Basic Program Facts

States have three options for SCHIP programs:

- Separate SCHIP program (S-SCHIP)
- Medicaid expansion program (M-SCHIP)
- Combination of both

Hawaii runs a Medicaid expansion program.

Eligibility

SCHIP was enacted to provide health coverage to targeted low income children. Federal rules and waivers allow states to set their income eligibility at levels that are higher or lower than the target level of 200% of the federal poverty level (\$43,300 for a family of four in 2007). States that cover families at higher income levels usually require some cost sharing.

Hawaii is one of 19 states that set eligibility for coverage at a level greater than 200% of the federal poverty level (FPL). Hawaii's upper income eligibility limit is 300% FPL. Families at the higher ends of income eligibility pay higher premiums.

Program Type by Age	Eligibility as % of FPL	Premium Requirement
Medicaid SCHIP		
infants	185%–300%	\$15–\$60
1–5 yrs	133%–200%	\$0
6–18 yrs	100%–300%	\$15–\$60

Cost Sharing

Many SCHIP programs require enrollees to share in the cost of coverage or services by paying premiums or co-payments. The type of SCHIP program a state has determines its flexibility in establishing cost-sharing requirements. M-SCHIP programs have less flexibility than S-SCHIP programs.

Hawaii requires monthly premiums that range from \$15 to \$60 for children with family incomes at or above 251% FPL.

Benefit Package

All SCHIP Medicaid expansion programs must provide the federally required Medicaid benefit package. Separate SCHIP programs must offer benefits meeting federal requirements under a number of options.

Hawaii's Medicaid Expansion Covered Benefits include (but are not necessarily limited to):

- Physician services
- Inpatient hospital services
- Inpatient and outpatient mental health services
- Inpatient and outpatient substance abuse services
- Home health services
- Pharmacy
- Dental preventive and treatment services
- Hearing aids
- Eyeglasses
- Prosthetic appliances

Outreach, Enrollment and Retention

Because application, enrollment, and renewal processes are critical in reaching SCHIP's goal of reducing the number of uninsured children, states have worked on outreach and simplification efforts to enroll and retain children in SCHIP programs.

Hawaii's efforts include (but are not limited to):

- Pre-printed reapplication information is sent out to families for updates 45 days in advance of the coverage renewal date
- Families must respond only if information has changed
- Distribution of applications and brochures in public schools
- SCHIP newspaper advertisements

Quality²

Since program inception, SCHIP programs have implemented various policies to promote access to quality care. States worked with the federal Centers for Medicare and Medicaid Services (CMS) to develop a set of performance measures that states could report annually. Four core measures based on the Health Plan Employer Data and Information Set (HEDIS) were chosen:

- Well child visits for infants under 15 months
- Well child visits for children ages 3, 4, 5, and 6
- Use of appropriate asthma medications
- Access to primary care providers (PCP)

Access to primary care providers, the measure specified in these 'SCHIP STATE SNAPSHOTS' was not available.
