

State Children's Health Insurance Program

The State Children's Health Insurance Program (SCHIP) has become an important source of coverage for children and families. SCHIP and Medicaid together have contributed to the decline in uninsured children from 14% of all children in 1997 to 9% in 2005. SCHIP needs to be reauthorized in 2007 with substantial new funding if the program is to maintain and build on its successes.

SCHIP State Snapshots: North Dakota CHIP

	2005 Enrollment	Federal Match Rate ¹
North Dakota	30,275	77.2%
United States	6.1 million	65%–85%

Basic Program Facts

States have three options for SCHIP programs:

- Medicaid expansion (M-SCHIP)
- Separate SCHIP program (S-SCHIP)
- Combination of both

North Dakota runs a combination program, operating both a Medicaid expansion and separate SCHIP.

Eligibility

SCHIP was enacted to provide health coverage to targeted low income children. Federal rules and waivers allow states to set their income eligibility at levels that are higher or lower than the target level of 200% of the federal poverty level (\$43,300 for a family of four in 2007). States that cover families at higher income levels usually require some cost sharing.

North Dakota sets eligibility for coverage at 140% of the federal poverty level (FPL).

Program Type by Age	Eligibility as % of FPL	Premium Requirement
Medicaid SCHIP		
infants	0%–133%	\$0
1–5 yrs	0%–133%	\$0
6–18 yrs	0%–100%	\$0
Separate SCHIP		
infants	134%–140%	\$0
1–5 yrs	134%–140%	\$0
6–18 yrs	101%–140%	\$0

Cost Sharing

Many SCHIP programs require enrollees to share in the cost of coverage or services by paying premiums or co-payments. The type of SCHIP program a state has determines its flexibility in establishing cost-sharing requirements. M-SCHIP programs have less flexibility than S-SCHIP programs.

North Dakota's SCHIP program does not include premium requirements.

Benefit Package

All SCHIP Medicaid expansion programs must provide the federally required Medicaid benefit package. Separate SCHIP programs must offer benefits meeting federal requirements under a number of options.

North Dakota's Separate SCHIP Covered Benefits include (but are not necessarily limited to):

- Physician services
- Inpatient hospital services
- Inpatient and outpatient mental health services
- Inpatient and outpatient substance abuse services
- Home health services
- Pharmacy
- Dental preventive and treatment services
- Hearing aids
- Vision services and eyeglasses
- Prosthetic appliances

Outreach, Enrollment and Retention

Because application, enrollment, and renewal processes are critical in reaching SCHIP's goal of reducing the number of uninsured children, states have worked on outreach and simplification efforts to enroll and retain children in SCHIP programs.

North Dakota's efforts include (but are not limited to):

- Continuous eligibility guarantee for 12 months, which reduces the chance that children will have breaks in coverage or be dropped from the program for failure to complete paperwork
- Reapplication information is sent out to families for updates at least 10 days prior to the coverage renewal date
- Distribution of applications and brochures in public schools
- SCHIP media campaign (television, radio, print, outdoor advertising)

Access to Primary Care Physicians in 2004

Age	Percent
	61%

Quality²

Since program inception, SCHIP programs have implemented various policies to promote access to quality care. States worked with the federal Centers for Medicare and Medicaid Services (CMS) to develop a set of performance measures that states could report annually. Four core measures based on the Health Plan Employer Data and Information Set (HEDIS) were chosen:

- Well child visits for infants under 15 months
- Well child visits for children ages 3, 4, 5, and 6
- Use of appropriate asthma medications
- Access to primary care providers (PCP)

North Dakota provided data on all four measures in its 2005 annual report to CMS, which is the most recent report available. The data to the left is an example from North Dakota's report.
