

Quality Improvement Innovation Network (QuIIN) Honor Roll

QuIIN is the AAP's quality improvement network. The mission of the QuIIN, a network of practicing pediatricians and their staff, is to improve care and outcomes for children and families by testing practical tools, measures, and strategies for use in everyday pediatric practice, the child's medical home. Since its inception in 2005, the practitioners of QuIIN have worked to improve care by representing the pediatrician in the development of clinical practice guidelines, identifying tools to support implementation of evidence based medicine, and testing and improving tools before dissemination. Recent examples include care improvement around Asthma, Child Abuse and Neglect Prevention, Newborn Care, and Otitis Media. The following pediatricians participated in QuIIN activities.
