Abbreviations used in this report: **MP:** Manually priced, i.e., Carrier will establish payment amounts for these services, generally on a case-by-case basis following review of documentation, such as an operative report. **BR:** By report, i.e., Carrier will establish payment amounts for these services on a case-by-case basis following review of documentation, such as an operative report. **BO:** Bundled with other services, i.e., Payment for covered services is always bundled into payment for other services not specified. If these services are covered, payment for them is subsumed by the payment for the services to which they are incident. **OM:** Other method(s). **NC:** Not covered. **NA:** Not applicable. **NP:** Information not provided by state. **NL:** Information not provided by state, nor found on Medicaid fee schedule posted on state's web site. **NIS:** RVUs for code not included in RBRVS schedule. **LFS:** National limit amount per Clinical and Diagnostic Lab Fee Schedule.

Notes: (1) FFS payment (rates included in this report) may not apply to some or all services used by children in capitated plans. According to FFY2002 MSIS reports published by CMS, 39% of Texas children (under age 19) enrolled in Medicaid were in capitated plans. (2) Unless otherwise noted, the highest non-facility Medicaid payment rate is presented in this report when multiple rates are used by the state. (3) Medicare rates are GPCI-adjusted for geographic variation in medical care cost. Medicare rates may vary by region in states with multiple Medicare carriers. ***TX pays high volume providers 1.9% over regular rates; high-volume specialists are paid 6.1% higher. Rates shown in this report are regular rates.
