

Early and Periodic Screening, Diagnosis and Treatment (EPSDT)

MICHIGAN (MI)

Medicaid's EPSDT benefit provides comprehensive health care services to children under age 21, with an emphasis on prevention, early detection, and medically necessary treatment. Each state Medicaid program establishes a periodicity schedule for physical, mental, developmental, vision, hearing, dental, and other screenings for infants, children, and adolescents to correct and ameliorate health conditions.

Bright Futures is a national health promotion and prevention initiative, led by the American Academy of Pediatrics (AAP) and supported by the Maternal and Child Health Bureau (MCHB), Health Resources and Services Administration (HRSA). The *Bright Futures Guidelines for Health Supervision of Infants, Children, and Adolescents* (4th Edition)¹ and the corresponding Bright Futures/AAP Recommendations for Preventive Pediatric Health Care (Periodicity Schedule)² provide theory-based and evidence-driven guidance for all preventive care screenings and health supervision visits through age 21. Bright Futures is recognized in federal law as the standard for pediatric preventive health insurance coverage.³ The Centers for Medicare and Medicaid Services (CMS) encourages state Medicaid agencies to use this nationally recognized Bright Futures/AAP Periodicity Schedule or consult with recognized medical organizations involved in child health care in developing their EPSDT periodicity schedule of pediatric preventive care.^{4,5} The following analysis of Michigan's EPSDT benefit was conducted by the AAP to promote the use of Bright Futures as the professional standard for pediatric preventive care.

Michigan's profile compares the state's 2018 Medicaid EPSDT benefit with the [*Bright Futures: Guidelines for Health Supervision of Infants, Children, and Adolescents, 4th Edition*](#), and the [*Bright Futures/AAP Recommendations for Preventive Pediatric Health Care \(Periodicity Schedule\)*](#) published in *Pediatrics* in April 2017.² This state profile also contains information about Michigan's 2016 Medicaid pediatric preventive care quality measures and performance based on the state's voluntary reporting on selected Child Core Set measures. Information about the state Medicaid medical necessity definition used for EPSDT and a promising practice related to pediatric preventive care is also found here. Michigan's profile is based on a review of the state's Medicaid website, provider manual, and other referenced state documents, and an analysis of 2016 state Medicaid data reported to CMS on child health quality.⁶ This profile was also reviewed by state Medicaid EPSDT officials. Information is current as of March 2018.

Summary of Findings

- Michigan's 2018 EPSDT requirements follow the Bright Futures/AAP Periodicity Schedule and screening recommendations.
- The state's medical necessity definition, described below, incorporates a preventive purpose.
 - Health care interventions that are evidence based, evidence informed, or based on consensus advisory opinion and that are recommended by recognized health care professionals to promote optimal growth and development in a child and to prevent, detect, diagnose, treat, ameliorate, or palliate the effects of a physical, genetic, congenital, developmental, behavioral, or mental conditions, injuries, or disabilities.
- According to CMS, in 2016, Michigan selected all 10 pediatric preventive care measures in the Child Core Set.
- Michigan's quality performance rates, as shown in the table below, were at or above the national average for 8 of the 10 measures. Rates for HPV vaccinations and preventive dental services were lower than the national average.
- The state has pediatric preventive care performance improvement projects underway related to well child visits for 0-15 age group and 3-6 age group, childhood immunizations, childhood immunizations racial disparity, lead screening, and BMI assessment.

Promising Practices

Michigan issued a policy bulletin (MSA 16-46) to its providers on coverage for trauma services for children under 21. The bulletin begins with background on adverse childhood experiences and their long-term impacts. It recommends that primary care providers (PCPs) adopt current best practices to screen for toxic stress, using tools indicated by the AAP, including the Adverse Childhood Experiences Questionnaire (ACE-Q), Resilience Questionnaire, and Pediatric Intake Form. The bulletin offers suggested questions to ask parents/caregivers and children when there are unexplained somatic complaints or other indicators that may be associated with exposure to trauma or adversity. The Michigan bulletin encourages PCPs to bill for trauma screening, with reference to appropriate codes. Finally, it provides detailed information about referrals for behavioral health services.

Comparison of MI EPSDT and AAP/Bright Futures Periodicity Schedules

The following tables provide information on Michigan’s EPSDT periodicity schedule and screening recommendations by age group, comparing 2018 Michigan Medicaid EPSDT requirements with the 2017 Bright Futures/AAP Recommendations for Preventive Pediatric Health Care.²

Code	Number of Well Child Visits by Age	MI EPSDT	Bright Futures
U = Universal (all screened)	- Birth through 9 months	7	7
S = Selective screening (only those of higher risk)	- 1 through 4 years	7	7
U/S = Universal and selective requirement	- 5 through 10 years	6	6
	- 11 through 14 years	4	4
	- 15 through 20 years	6	6

See Bright Futures/AAP Periodicity Schedule for complete information.

Universal (U) and Selected (S) Screening Requirements	MI EPSDT	Bright Futures
Infancy (Birth-9 months)		
- Length/height & weight	U	U
- Head circumference	U	U
- Weight for length	U	U
- Blood pressure	S	S
- Vision	S	S
- Hearing	U/S	U/S
- Developmental screening	U	U
- Developmental surveillance	U	U
- Psychosocial/behavioral assessment	U	U
- Maternal depression screening	U	U
- Newborn blood screening	U	U
- Critical congenital heart screening	U	U
- Anemia	S	S
- Lead	S	S
- Tuberculosis	S	S
- Oral health	U/S	U/S
- Fluoride varnish	U	U
- Fluoride supplementation	S	S

Pediatric Preventive Care Quality Measures, Performance, and Financial Incentives

Included in the tables below are Michigan's 2016 quality performance information on pediatric preventive care measures reported to CMS⁶, as well as their use of financial incentives for pediatric preventive care.

Pediatric Preventive Care Quality Measures and Performance, 2016 Child Core Set	MI	US
- % of children with primary care visit		
• Ages 12-24 months (in past year)	96.2	95.2
• Ages 25 months-6 years (in past year)	88.8	87.7
• Ages 7-11 (in past 2 years)	90.9	90.9
• Ages 12-19 (in past 2 years)	89.9	89.6
- % of children by 15 months receiving 6 or more well-child visits	66.2	60.8
- % of children ages 3-6 with one or more well-child visits	75.1	68
- % of adolescents ages 12-21 receiving 1 well care visit	54.7	45.1
- % of children by 2nd birthday up-to-date on recommended immunizations (combination 3)	71.1	68.5
- % of adolescents by 13th birthday up-to-date on recommended immunizations (combination 1)	87	70.3
- % of sexually active women ages 16-20 screened for chlamydia	60.8	48.8
- % of female adolescents by 13th birthday receiving 3 HPV doses	20.4	20.8
- % of children ages 3-17 whose BMI was documented in medical records	74.9	61.2
- % of children ages 1-20 with at least 1 preventive dental service	41.8	48.2

Pediatric Preventive Care Financial Incentives, 2016	MI	US
- Use of preventive incentives for consumers	Yes	NA
- Use of performance incentives for providers	Yes	NA
