Maintenance of Certification (MOC) Part 4 Project Chart Review Measures**

DEVELOPMENTAL SCREENING MEASURES

The target population are patients seen for their 9-month, 18-month, and 24- or 30-month health supervision visits.

Measure Name/Type	Measure Definition	Source of Measure	Measure Calculation (Numerator/Denominator)	Measure Exclusion	Data Source/ Associated Collection Tool	Measure Benchmark	Measure Target/ Goal (%)	Data Collection Plan	Associated Questions
Developmental Screening	% of patients screened for risk of developmental, behavioral, and social delays using a standardized screening tool at the 9, 18, and 24- or 30-month health supervision visit	CHIPRA Core Set	<p>Target Population: All patients seen for their 9-month, 18-month, and 24- or 30-month health supervision visit. (Note: you may choose either the 24- or 30-month visit for this measure depending on when you conduct developmental screening.)</p> <p>Numerator: # patients seen at their 9-month, 18-month, and 24- or 30-month health supervision visit with documentation in chart of a completed standardized developmental screen at the time of the visit.</p> <p>Denominator: All patients seen for their 9-month, 18-month, and 24- or 30-month visit whose charts are reviewed</p>	N/A	Patient charts/chart review tool	N/A	90%	<p>Volume: 15 to 20 charts/records</p> <p>Frequency: Monthly</p> <p>Method of Transmission: QIDA</p>	<p>Is there documentation in the medical record that a standardized developmental screening was conducted at the 9-month visit?</p> <p>Is there documentation in the medical record that a standardized developmental screen was conducted at the 18-month visit?</p> <p>Is there documentation in the medical record that a standardized developmental screening was conducted at the 24- or 30-month visit?</p>
