**A Summer Camp for Children and Teens Who Have Seizures**

Epilepsy Foundation of Western/Central Pennsylvania (EFWCP) Camp Frog

The annual Camp Frog program is a weeklong, overnight summer camp for children ages 8-17 with a primary diagnosis of epilepsy. Although fully integrated into an existing Young Men’s Christian Association (YMCA) camp, Camp Frog provides additional supportive and medical services that would not be found in a traditional camp setting. Camp Frog is offered for two weeks during the summer, once at Camp Conrad Weiser, near Reading, and once at Camp Fitch, near Erie, PA.

In this integrated camping model, EFWCP Camp Frog participants are assigned to a cabin for the week with four to six other campers who have privately registered to attend the YMCA camp that week. One additional EFWCP counselor is also assigned to that cabin. A pediatric neurologist and nurse, additional EFWCP counselors, the EFWCP Family Services Coordinator all help to supplement YMCA camp staff and ensure the safety of campers.

Every child, regardless of their ability to pay for camp fees, is eligible to attend camp because the Steve “Froggy” Morris/G. Peter Rockwell Endowment Fund, established in 2006 by the EFWCP is able to offer camp scholarships to families who are unable to pay for camp.
3rd annual Networking Event and Meeting

The final meeting of the 2013-2016 Maternal Child Health Bureau project titled “Increasing Access to Care for Children and Youth with Epilepsy” occurred on June 6th and 7th at the Embassy Suites in Alexandria, Virginia. The focus of this meeting was to review the successes, challenges, and lessons learned during the past three years with regard to measuring program impact, data collection, educational strategies, rural health/ cultural effectiveness, and quality improvement. This 3 year project has been an amazing opportunity as the teams from seven states and the Coordinating Center celebrated a successful project completion!
During the meeting, we conducted a team activity that helped us create the word cloud that is featured below. It was created to identify key words/phrases that highlighted the last three years in the project.

The “E” is for Epilepsy and is created in the Epilepsy Awareness color.
COORDINATING CARE FOR KIDS—SCHOOL NURSES LINKING WITH THE MEDICAL HOME: WEBINAR RECORDING AND RESOURCES AVAILABLE

If you missed the May 25, 2016 "Care Coordination for Kids: School Nurses Linking with the Medical Home" webinar, click here. Under "Resources: Coordinating Care for Kids—School Nurses Linking with the Medical Home Webinar" please find: 1) a video recording of the webinar; 2) presentation slides; and 3) links to all the resources discussed during the webinar, including the School Nurse Curriculum. This webinar discussed the effectiveness of care coordination when communication between school health and medical communities is established and implemented in a structured manner. A webinar from the National Center for Medical Home Implementation, a cooperative agreement between the American Academy of Pediatrics and the Maternal and Child Health Bureau of the Health Resources and Services Administration.

HIGH VALUE CARE: NEW TRANSITIONS OF CARE TOOLKIT

A new Transitions of Care Toolkit designed to assist physicians in transitioning patients from pediatric care to an adult primary or specialty setting of care is now available. Developed by the American College of Physicians (ACP) Council of Subspecialty Societies, with participation from the American Academy of Pediatrics (AAP), multiple medical specialty groups and patient advocacy organizations, the toolkit contains disease/condition-specific tools developed to assist physicians in transitioning young adults with chronic diseases/conditions into adult care settings. Based on the clinical report, “Supporting the Health Care Transition From Adolescence to Adulthood in the Medical Home,” from the AAP, ACP, and American Academy of Family Physicians, the National Health Care Transition Center/Got Transition developed an evidence-informed model, the Six Core Elements of Health Care Transition, which includes free sample tools clinicians can download and implement in their offices. These core elements were used as a basis for the development of the Transitions of Care Toolkit. Click here for more information and to access the Transitions of Care Toolkit.

THINKING OUTSIDE THE BOX: HOW TO ADVANCE HEALTH EQUITY AND CARE QUALITY IN THE PEDIATRIC MEDICAL HOME

This 3-part recorded webinar series provides pediatric clinicians, Title V programs, families and others with tools, resources, and strategies to enhance the patient and family experience in the pediatric medical home. This includes but is not limited to, the experience of diverse, vulnerable and medically underserved populations.

View all webinar recordings, slides, and supporting materials here.
CHILDREN’S HEALTH FUND - WHITE PAPER ON TELEHEALTH

The Samsung Innovation Center at the Children’s Health Fund created a report titled, “15 Million Kids in Health Care Deserts, Can Telehealth Make a Difference.” It focused on topics such as the issues at hand, the benefits, and how to increase telehealth technology availability.

THE AAP SECTION ON NEUROLOGY-SPONSORED EPILEPSY AND MOVEMENT PROGRAMS AT THE 2016 NCE

The Section on Neurology will host continuing medical education programs on epilepsy and movement issues for the general pediatrician and pediatric subspecialists at the AAP annual meeting, the National Conference and Exhibition (NCE), in San Francisco, CA, October 22-25, 2016.

Programs Include:

**TICS, CANS and Other Movement Disorders**, Seminar (October 22, 4-5:30 pm)

*Telementoring for Chronic Disease Management*” Interactive Group Forum (October 23, 8:30-10 am)

**First Seizure, Second Seizure; What Do I Do Now?**, Seminar (October 23, 4-5:30 pm and October 24, 2-3:30 pm)

**Neurology Problems That YOU Can Manage**, Seminar (October 23 8:30-10 am)

For course descriptions visit the [Section on Neurology NCE Education Programs](#). Visit the [Section's website](#) or contact Section Manager, Lynn Colegrove, with your questions related to Section on Neurology business or activities.
As the 2013-2016 grant draws to a close in August, we thank everyone for all of the hard work and dedication exhibited to make this a remarkable three years and increasing access to care for CYE!

“Obstacles don’t have to stop you. If you run into a wall, don’t turn around and give up. Figure out how to climb it, go through it, or work around it.”

-Michael Jordan
