Goals and Objectives for International Rotation

1. **Patient Care**
   - Provide direct patient care to pediatrics patients in both inpatient and outpatient clinic settings at a mission hospital.

2. **Medical Knowledge**
   - Increase familiarity of diagnosis and treatment of tropical diseases
   - Become familiar with medications and procedures common to resource-limited medical practice

3. **Interpersonal & Communication Skills**
   - Improve communication skills using trained interpreters for varying local dialects.
   - Understand the role of the visiting trainee/clinician

4. **Practice-Based Learning and Improvement**
   - Participate in current, or help establish, new quality improvement initiatives with goal to improve patient and hospital outcomes.
   - Participate in established educational opportunities on site

5. **Professionalism**
   - Become familiar with local cultural customs and apply to patient care to provide respectful and responsible care
   - Adhere to professional ethical standards equivalent to those at home institution

6. **Systems-Based Practice**
   - Adapt to working within established medical systems in a resource-limited setting.
   - Assist with incorporation of current systems based approaches in the USA into the practices of the local facility, if requested and as applicable in the resource-limited medical practice.
