The Non-Stop Cough: Current Guidelines and Recommendations
Monday, October 24, 2016
Marriott Marquis, Golden Gate C

The child who can’t stop coughing can be a diagnostic and management challenge for even the most experienced pediatrician. The objective of this session is to provide the participant with the latest guidelines for managing patients with chronic cough. Our panel of national and international experts will discuss the multiple etiologies of chronic cough with special attention paid to the approach and behavioral management of somatic (habit) cough, followed by a panel discussion of challenging cases. Audience participation is welcome so bring along your challenging cases to discuss with the experts!

1:00 pm – 5:00 pm  Moderator: Steven E. Sobol, MD, MSc, FAAP
