Parental literacy screening questions for QI project Pre and post-implementation

About the parents:

1. Does the parent read for pleasure?
2. Does the other parent spend appropriate time reading with the child?
3. How often do you read with your child?
4. Do you have a home library of books for your child?

About the child:

1. Do you know if your child met the developmental milestones of early literacy?
2. How do you know if the book you select is appropriate for your child?
3. What age did you begin to read to your child?
4. Have you used the “Get ready to read screening tool” to assess if your 4 year old is on track for learning how to read?
5. How many hours of screen time does your child have on an average per day?
6. Are you concerned about any learning disability in your child?

About the local resources and access to resources:

1. Did you have access to age appropriate books for your child when you were waiting to be seen by your doctor?
2. Are you aware of your community resources where you can find information or books to promote reading in your child?
