Call for Proposals
Applications available May through July and November through January

The Academy is seeking grant applications for innovative community-based projects to improve access to health care services for children who are most likely to experience barriers. Eligible initiatives reach out to the community at large.

Up to $10,000 will be awarded to pediatricians and fellowship trainees and $2,000 to pediatric residents to work collaboratively with local community partners to ensure that all children have medical homes and access to health care services not otherwise available in their communities.

Visit the CATCH funding page at [www2.aap.org/catch/funding.htm](http://www2.aap.org/catch/funding.htm) for application guidelines and resources to help you plan your initiative.

Help is available: Your Chapter CATCH Facilitators and District Resident CATCH Liaisons are available to discuss your ideas and help with proposal development.

To see what others are doing with their CATCH grants, visit the Community Pediatrics grants database at [www2.aap.org/commpeds/grantsdatabase](http://www2.aap.org/commpeds/grantsdatabase) where you can search by several major categories, including health topic and grant program.

One pediatrician can make a difference!
