**AMERICA’S OPIOID CRISIS: THE UNSEEN IMPACT ON ALASKA CHILDREN**

**A GROWING CRISIS**
- **28% MORE** opioid-related deaths nationwide since 2015.
- **88.2%** of people in Alaska suffering from drug dependence or abuse go untreated.
- **8.7 MILLION CHILDREN** nationwide have a parent who suffers from a substance use disorder.

**A NEED FOR FAMILY-CENTERED POLICIES**
- **KEEPING FAMILIES TOGETHER IMPROVES OUTCOMES AND LOWERS COSTS**

**MORE THAN HALF** of children placed in foster care go home to their families. Keeping families together from the start helps prevent further trauma and improves outcomes.

**MEDICAID PAID 81% OF THE $1.5 BILLION** that hospitals billed for treating babies suffering from opioid withdrawal in 2012.

**A DEVASTATING TOLL ON CHILDREN**
- **1,336 ALASKA CHILDREN** were placed in foster care in 2016.
- **19% WERE INFANTS.** In 48% of these placements, parental substance use was a factor.

**A LIFELONG IMPACT**
Children dealing with traumatic experiences can face social, emotional, physical, and mental health challenges that last into adulthood.

Left unaddressed, early childhood adversity can lead to school failure, risky behaviors like alcohol and drug use, and increased chance of health conditions like obesity and heart disease.

**WHAT YOU CAN DO**
- **RETHINK OUR APPROACH: SUPPORT CHILDREN AND FAMILIES IN HEALING TOGETHER**
  - Create policies that prioritize prevention and allow children to remain safely with their families during treatment.
  - Give providers tools to recognize, treat, and support children and their parents affected by trauma to lessen the lifelong impact and promote healthy families.
  - Ensure families have real and timely access to services through Medicaid and other prevention and treatment programs.
