A GROWING CRISIS

- **28% MORE** opioid-related deaths nationwide since 2015.
- **83.9%** of people in South Carolina suffering from drug dependence or abuse go untreated.
- **8.7 MILLION** children nationwide have a parent who suffers from a substance use disorder.

A NEED FOR FAMILY-CENTERED POLICIES

- **KEEPING FAMILIES TOGETHER IMPROVES OUTCOMES AND LOWERS COSTS**
- **MORE THAN HALF** of children placed in foster care go home to their families. Keeping families together from the start helps prevent further trauma and improves outcomes.

MEDICAID PAID 81% OF THE $1.5 BILLION that hospitals billed for treating babies suffering from opioid withdrawal in 2012.

A DEVASTATING TOLL ON CHILDREN

- **3,752 SOUTH CAROLINA CHILDREN** were placed in foster care in 2016.
- **15% WERE INFANTS.** In 17% of these placements, parental substance use was a factor.

A LIFELONG IMPACT

Children dealing with traumatic experiences can face social, emotional, physical, and mental health challenges that last into adulthood. Left unaddressed, early childhood adversity can lead to **school failure**, risky behaviors like **alcohol and drug use**, and increased chance of health conditions like **obesity and heart disease**.

WHAT YOU CAN DO

RETHINK OUR APPROACH: SUPPORT CHILDREN AND FAMILIES IN HEALING TOGETHER

- **Create policies that prioritize prevention** and allow children to remain safely with their families during treatment.
- **Give providers tools** to recognize, treat, and support children and their parents affected by trauma to lessen the lifelong impact and promote healthy families.
- **Ensure families have real and timely access to services** through Medicaid and other prevention and treatment programs.
