

I am unable to claim my credit for the PREP Self Assessment

You can refer to the following steps to complete your course and claim credit (Images are samples):

1. If you can verify the course has been completed in Learning Mode. In order to receive credit, the course needs to be completed in this mode.

The screenshot shows the top navigation bar with tabs: Home, Assessment, Answer Sheet, Performance, Confidence, and PREP Pearls. Below the navigation bar, the page title is "All Questions". There is a search box and a "Search" button. The "Question View" is set to "All". The "Mode" is set to "Learning" (indicated by a green checkmark and a red circle around the text), with "Exam" as an alternative option. The "Reset Assessment" button is visible. The progress bar shows "1 of 271" questions, with "Print" and "Add Bookmark" options. A green bar at the bottom of the progress section displays: "ASSESSMENT PROGRESS: Total Questions: 271 Questions Answered: 271 Correct Answers: 66". Below this, the heading "Question 1" is visible.

2. If you can verify that there are no unanswered questions and that you have achieved at least a 70% on your course. In order to receive credit, all questions need to be answered and a minimum passing score of 70% is required.

The screenshot shows the "2016 PREP Self Assessment" results page. The top navigation bar includes: Home, Assessment, Answer Sheet, Performance, Confidence, and PREP Pearls. The page title is "2016 PREP Self Assessment". There are two buttons: "Start the assessment" and "Continue where I left off". The "Current Cycle" section shows a table with the following data:

Total Questions	Answered	Unanswered	Correct	Incorrect	% Correct	Pass/Fail
271	271	0	197	74	72.69%	Pass

The "Unanswered" cell (0) and the "% Correct" cell (72.69%) are circled in red. Below the table, there is a "Welcome to PREP Self-Assessment Online" message and a list of features:

- Over 200 multiple choice questions including critiques
- Links to many of the references
- Search capabilities, for customizing your experience
- Online submission for credit

The page footer includes: "Copyright © 2016 American Academy of Pediatrics. All rights reserved." and "Report an issue with this page. Links may open in a separate window. Pop-up Blocker may need to be disabled."

3. In the questions, if you can verify that the Complete Assessment button has been clicked.

2014-2015 button will be located towards the bottom

ASSESSMENT PROGRESS: Total Questions: 254 Questions Answered: 254 Correct Answers: 56

Question 253

A 6-month-old male infant is seen for his routine health supervision visit. He is doing well at home, gaining weight, and meeting his milestones. The mother mentions some concerns about flattening of her son's head posteriorly, and you examine his head from above. While he has no evidence of torticollis, he has right-sided flattening of the occiput as well as flattening above the right orbit, giving a trapezoidal appearance to his head. His mother confirms that they have been placing him in a supine position to sleep at night. They also have been giving him "tummy time" at home during the day and, since his last checkup at 4 months of age, have been alternating his sleeping direction on a weekly basis so that his left and right sides are facing his bedroom door equally.

Of the following, you are MOST likely to recommend

- A. continued tummy time and alternating head direction in bed with follow-up in the pediatric office in 1 month
- B. referral to a pediatric neurosurgeon for evaluation for a possible right coronal craniosynostosis
- C. referral to a physical therapist to work with the parents on neck stretching exercises
- D. referral to the craniofacial team to fit a helmet to correct the positional head deformity
- E. a switch to a prone sleeping position now that he is capable of rolling over and holding his head up

Question 275

A 3-month-old infant is brought to your office because he has been very irritable, and feeding poorly over the past 2 days. He vomited once this morning. The infant has had no fever or symptoms of an upper respiratory infection. He is a full-term infant with no significant past medical history and he has been growing and developing appropriately. His mother just returned to work last week and his father, who is unemployed, has been caring for the infant during the day. She thinks that the baby's fussiness may be due to the recent change in his routine.

In your office, the baby's vital signs include a temperature of 37.2°C, heart rate of 160 beats/min, respiratory rate of 36 breaths/min, and pulse oximetry of 96% on room air. On physical examination, the baby is very fussy and the mother is having difficulty consoling him. There are several circular bruises on his right forehead and left forearm. The remainder of his physical examination is unremarkable. His mother denies any history of trauma.

You advise the baby's mother that he should undergo further evaluation in the emergency department because of his

You have met the requirements for Maintenance of Certification (MOC).
Notify the American Board of Pediatrics (ABP) of completion.

You have met the requirements for AMA PRA Category 1 Credit
Claim Continuing Medical Education (CME) credits.

2016 PREP Self-Assessment Completion requirements:

In order to successfully complete the 2016 PREP Self-Assessment for AMA PRA Category 1 Credit™ or MOC part II points, learners must achieve the following 3 steps:

1. *Minimum performance level* -- demonstrate a minimum performance level of 70% or higher on this assessment, which measures achievement of the educational purpose and objectives of this activity; if you score less than 70%, you will be redirected to incorrectly answered questions that can be reset and answered until a passing score is achieved.
2. *Learning mode* -- answer all the questions and record all answers in the learning mode using the online program in PediaLink.
3. *Complete course* -- confirm that every question has been answered.

If you do not see the claim credit links on the top of the claim credit page, please click on the refresh button on your browser.
