Note: 'na' Data unavailable. 'NA' Not applicable. # Recipient and expenditures by type of service data for AZ and GA are from FY95 and not included in regional and US estimates. Managed care service utilization and expenditure data are not included for HI since the state does not report managed care data on the HCFA2082. * EPSDT services are known to be under-reported in many states due to complexities in the reporting process.

^ When less than 0.05% of expenditures is accounted for by a type of service, it is rounded to 0.0%. + Percents do not sum to 100 because recipients use many services; when less than 0.05% use a service, it is rounded to 0.0%.

III. TITLE XIX AND TITLE XXI PROGRAM ELIGIBILITY BASED ON FAMILY INCOME AS A PERCENTAGE OF THE FEDERAL POVERTY LEVEL (FPL), JUNE 1998
 [Total Number of States with Expansions or Medically Needy Program in Brackets]

A. Title XIX Medicaid Eligibility and Expansions [44]

By federal mandate, all states must cover pregnant women and children to age 6 to 133% of the Federal Poverty Level (FPL) and children through age 14 up to 100% FPL, as of October 1, 1997.

In addition, 1996 federal welfare legislation requires states to use the AFDC income eligibility levels in effect as of July 16, 1996 to determine Medicaid eligibility. This establishes a state specific minimum eligibility level for poor children ages 15 through 18.

Michigan expanded its Title XIX Medicaid program to 185% FPL for pregnant women and infants and to 150% FPL for all children through age 14. The Medically Needy [34] were covered to 52% FPL in 1997. As of June 10, 1998, Michigan had not submitted a proposal for a Section 1115 Waiver.

IV. TITLE XIX (MEDICAID) AND FEDERALLY LEGISLATED TITLE XXI MEDICAID / SCHIP ELIGIBILITY FOR UNINSURED CHILDREN UNDER AGE 19, 1998 ESTIMATES

Analysis of the 1994 - 1997 March Current Population Surveys and 1998 Census Bureau projections of child population revealed an estimated 184K uninsured children under age 19, of whom 95.8K are unenrolled Medicaid eligibles, 47.0K are federally legislated Title XXI/SCHIP eligibles~. Full implementation of and maximum enrollment into both Title XIX and Title XXI programs would reduce Michigan's uninsured child population to 41.0K*, or 1.5% of the state's 2,648K children under age 19.

B. Title XXI SCHIP/Medicaid Program Eligibility:

Michigan's Title XXI Medicaid program covers children ages 15 through 18 to 150% FPL. MICHild covers remaining infants and children to 200% FPL. Federally legislated maximum Title XXI SCHIP/Medicaid program eligibility for infants in Michigan is 235% FPL. For children age 1 through 18, Michigan expanded its Title XXI SCHIP/Medicaid program eligibility to the maximum federally legislated limit. As of June 26, 1998, 42 states and the District of Columbia submitted their Title XXI/SCHIP plans and HCFA approved 22 of the submitted plans.

~ This estimate represents federally legislated eligibility (at or below 200% FPL or 50 percentage points above the state's Medicaid income limit as of March 31, 1997). Coverage could be provided through Medicaid or a separate state program.
 * Standard error is greater than 20%. This estimate is unreliable due to small sample size.
