Note: 'na' Data unavailable. 'NA' Not applicable. # Recipient and expenditures by type of service data for AZ and GA are from FY95 and not included in regional and US estimates. Managed care service utilization and expenditure data are not included for HI since the state does not report managed care data on the HCFA2082. \* EPSDT services are known to be under-reported in many states due to complexities in the reporting process.

^ When less than 0.05% of expenditures is accounted for by a type of service, it is rounded to 0.0%. + Percents do not sum to 100 because recipients use many services; when less than 0.05% use a service, it is rounded to 0.0%.

**III. TITLE XIX AND TITLE XXI PROGRAM ELIGIBILITY BASED ON FAMILY INCOME AS A PERCENTAGE OF THE FEDERAL POVERTY LEVEL (FPL), JUNE 1998**  
 [Total Number of States with Expansions or Medically Needy Program in Brackets]

**A. Title XIX Medicaid Eligibility and Expansions [44]**

By federal mandate, all states must cover pregnant women and children to age 6 to 133% of the Federal Poverty Level (FPL) and children through age 14 up to 100% FPL, as of October 1, 1997.

In addition, 1996 federal welfare legislation requires states to use the AFDC income eligibility levels in effect as of July 16, 1996 to determine Medicaid eligibility. This establishes a state specific minimum eligibility level for poor children ages 15 through 18.

Vermont expanded its Title XIX portion of Dr Dinosaur, Vermont's Medicaid program, to 225% FPL for pregnant women, infants and children through age 18. The Medically Needy [34] were covered to 81% FPL in 1997. As of June 10, 1998, Vermont implemented a Section 1115 Waiver.

**IV. TITLE XIX (MEDICAID) AND FEDERALLY LEGISLATED TITLE XXI MEDICAID / SCHIP ELIGIBILITY FOR UNINSURED CHILDREN UNDER AGE 19, 1998 ESTIMATES**

Analysis of the 1994 - 1997 March Current Population Surveys and 1998 Census Bureau projections of child population revealed an estimated 15K uninsured children under age 19, of whom 8.0K are unenrolled Medicaid eligibles, 1.6K\* are federally legislated Title XXI/SCHIP eligibles-. Full implementation of and maximum enrollment into both Title XIX and Title XXI programs would reduce Vermont's uninsured child population to 5.1K\*, or 3.2% of the state's 159K children under age 19.

**B. Title XXI SCHIP/Medicaid Program Eligibility:**

Vermont submitted a plan for the creation of a state program. Federally legislated maximum Title XXI SCHIP/Medicaid program eligibility for Vermont is 275% FPL for all infants and children through age 18. As of June 26, 1998, 42 states and the District of Columbia submitted their Title XXI/SCHIP plans and HCFA approved 22 of the submitted plans.

- This estimate represents federally legislated eligibility (at or below 200% FPL or 50 percentage points above the state's Medicaid income limit as of March 31, 1997). Coverage could be provided through Medicaid or a separate state program.  
 \* Standard error is greater than 20%. This estimate is unreliable due to small sample size.
