Data Entry Criteria

1. Was infant admitted to regular newborn nursery?  
   - Yes  
   - No  
   → Stop Here*

2. Was infant discharged from regular newborn nursery?  
   - Yes  
   - No  
   → Stop Here*

*If response to Q1 or Q2 is "NO", this chart is not eligible to review. Please identify an alternate eligible chart.

Risk for Severe Hyperbilirubinemia

3. Is there documentation that risk for severe hyperbilirubinemia was assessed (i.e., notation about risk based on assessment of clinical risk factors which may or may not include transcutaneous bilirubin (TcB) OR serum bilirubin (TSB))?  
   - Yes  
   - No

4. Does the discharge exam document the presence of jaundice and/or is the status of jaundice addressed in the discharge note?  
   - Yes  
   - No

5. Is there documentation that parents received oral counseling and written information about jaundice prior to discharge? (give credit only if both documented)  
   - Yes  
   - No  
   → Stop Q9

6. Was infant less than 72 hours of age at discharge?  
   - Yes  
   - No

Care Coordination

7. For infants discharged less than 72 hours of age, is there documentation of a plan for follow-up that includes infant being seen by a licensed health care provider within 2 days of discharge? (give credit only if all components are met)  
   - Yes  
   - No  
   → Skip to Q10

8. Is there documentation that explains why there is no plan for follow-up with licensed health care provider within 2 days of discharge (for infants discharged less than 72 hours of age)?  
   - Yes  
   - No

9. For infants discharged greater than 72 hours of age, is there documentation regarding the plan for follow-up? (e.g., family instructed to make appointment with PCP, family will receive home visit, etc.)  
   - Yes  
   - No

10. Are infant's primary care provider's name and/or name of practice documented on the chart?  
    - Yes  
    - No

Breastfeeding

11. Is there documentation of mother having breastfed infant at least once?  
    - Yes  
    - No  
    → Stop Here. End Review

12. Is there documentation that infant was put to breast within one hour of birth?  
    - Yes  
    - No

13. Is there documentation that mother was counseled to breastfeed at least 8-12 times/day? (may be noted in mother’s chart)  
    - Yes  
    - No

14. Is there documentation that infant is fed exclusively mother's milk without supplement?  
    - Yes  
    - No

15. A formal assessment of breastfeeding adequacy includes descriptions of position, latch, and milk transfer. Is there documentation that 2 formal assessments of breastfeeding were done that includes descriptions of position, latch and milk transfer?  
    - Yes  
    - No

16. Is there documentation that mother was provided contact information for breastfeeding questions and support?  
    - Yes  
    - No

17. Is there documentation that mother was provided with contact information for a licensed health care provider with knowledge and skill in breastfeeding management? (e.g., IBCLC-lactation consultant, nurse, MD, health worker, dietician, etc.)  
    - Yes  
    - No

18. Is there documentation that mother was provided with name and contact information for community or peer support groups for breastfeeding? (e.g., WIC peer support person, Le Leche League Int'l, etc.)  
    - Yes  
    - No
